Summary

Information Technology student in the Cybersecurity track, passionate about securing systems and ensuring compliance using industry best practices. Familiar with AI concepts, including machine learning and data analysis. Motivated, analytical, and eager to solve challenges while growing in dynamic technical environments.

Education

Bachelor of information technology | Cybersecurity Track

Aug 2022 – Present

King Saud University (KSU) — GPA: 4.84/5.00 (First Class Honors)

Achievements

- Co-authored and published two peer-reviewed research papers in MDPI journals.
- Led a 4-member team in an IBM collaboration, presenting outcomes to industry experts for validation.
- Presented the “Munir” project at major events, including IBM’s ICAN 2026 booth and the Tamkeen Exhibition.
- Developed and enhanced the IT 426 course curriculum and instructional materials under faculty supervision (paid academic role).

Projects

Munir – Graduation Project (in collaboration with IBM)

Aug 2025 – June 2026

Munir is an AI-powered assistive smart glasses and mobile application designed to support blind and visually impaired users through face recognition, text reading, currency and object detection, scene description, and voice-guided assistance to enhance daily independence.

Wasl Website – Winner of Academic Projects Competition

Jan 2025 – May 2025

Wasl is a web platform that connects innovators with investors, enabling idea showcasing and opportunity discovery to support entrepreneurship and foster innovation. The project won the Outstanding Academic Projects Competition at the IT Department.

Training Programs

IBM Developer – IBM

Aug 2025 – Nov 2025

- Developed generative AI solutions using IBM Watsonx and IBM Cloud, supported by ongoing mentoring from industry experts.
- Presented and demonstrated the final solution to IBM specialists and evaluators.

GRCP Camp – Cyber Guard

Aug 31,2025 – Sep 04,2025

- Built a solid foundation in GRC, emphasizing disciplined performance as a key element of effective governance.
- Oversaw end-to-end risk management processes, ensuring compliance through controls and continuous monitoring.

CyberKickstart Camp – IAU

Feb 08,2025 – Feb 23,2025

- Built foundational skills in Linux, secure networking, and applied cryptography, supporting both Red Team and Blue Team operations.
- Applied penetration testing, SOC monitoring, incident response, and digital forensics techniques in realistic simulated environments.

Leadership & Volunteering

Cybersecurity Club

Aug 2025 – Dec 2025

Served as the Vice-Chair of the HR Committee, managing member, communication, and activity tracking, while assisting in planning and organizing club programs and initiatives.

Beyond AI Club

Aug 2025 – Dec 2025

Technical Committee member responsible for managing the club’s website and leading digital presence tasks, ensuring functionality, updates, and user-focused design.

Skills

Technical skills: Risk Assessment – Compliance &Governance – Incident Response Awareness – Vulnerability Assessment – Network Security – Python – Java – SQL – NoSQL – PHP – JS – HTML/CSS

Soft skills: Problem Solving – Fast Learning – Time Management – Adaptability – leadership – Collaboration – Project Management.

Languages: Arabic – English.

Certificates

- Incident Response and Threat Mitigation - Coursera
- Cybersecurity Incident Response Analysis - Misk & STC
- Operational Risk Analysis - Misk & SIDF
- Artificial Intelligence Fundamentals - IBM
- Foundation Program in Artificial Intelligence - KSU
- Artificial Intelligence Concept - SDAIA
